

Reviving Old Tech With The Pi Pico

By none other than the guy who lost his slides

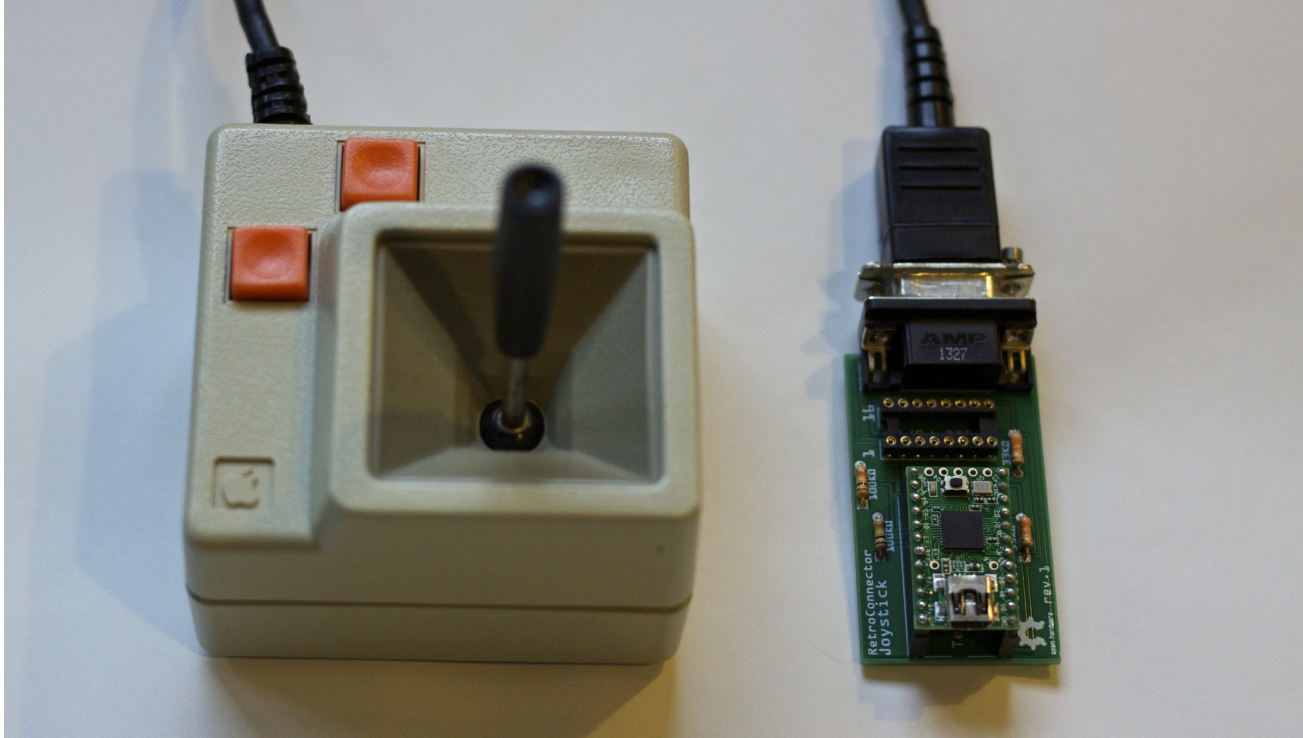

“pffft, who needs backups, right?”

Retro Tech

Retro tech is cool.
Compatibility with retro tech isn't.

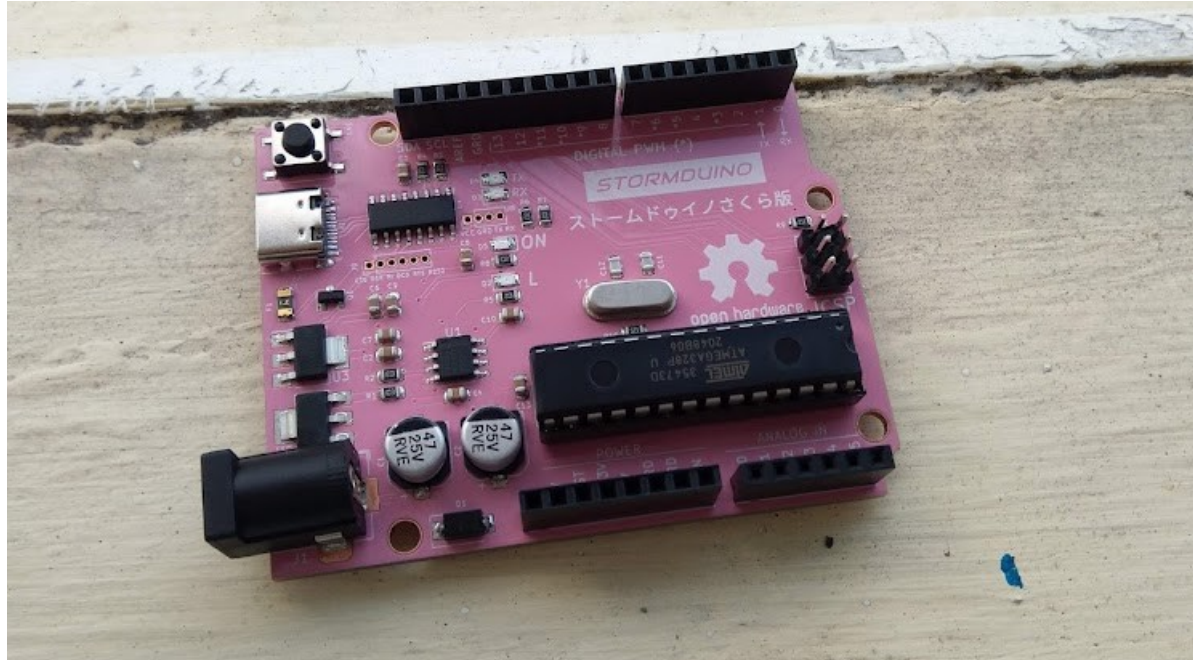

How It Used To Be Done

- Custom PCB
 - ICs
- Which are...*
- Expensive
 - Complex
 - Time Consuming

Introducing the Arduino

- Cheap
- Easy to use
- Convenient to program

Cue Workshop Music

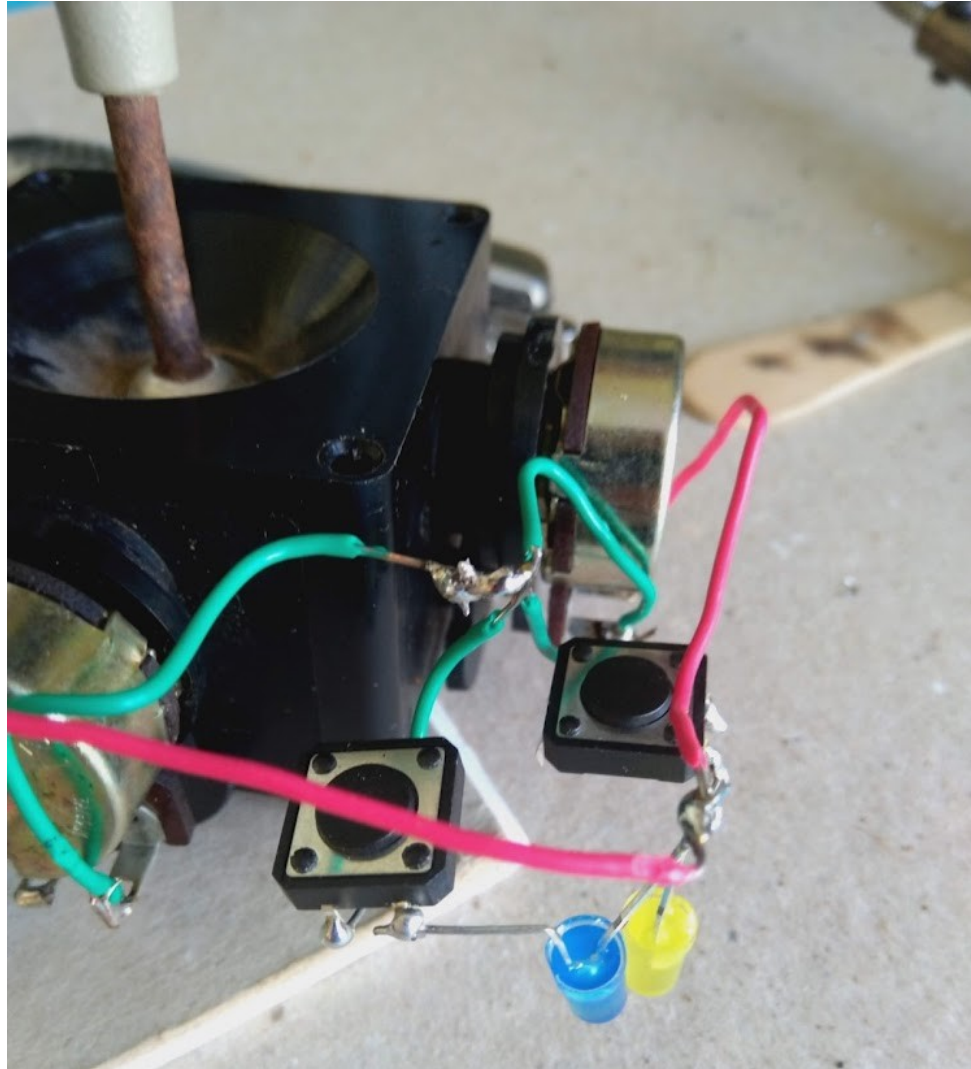

- Nothing a screwdriver can't fix break
- Try to understand what the ancient hardware guys did
- Fail

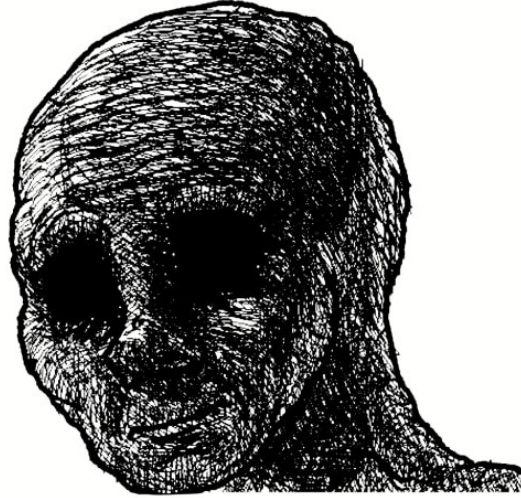

Am I Too Young?

- Necromancy is illegal
- I cannot just find someone to tell me how it works

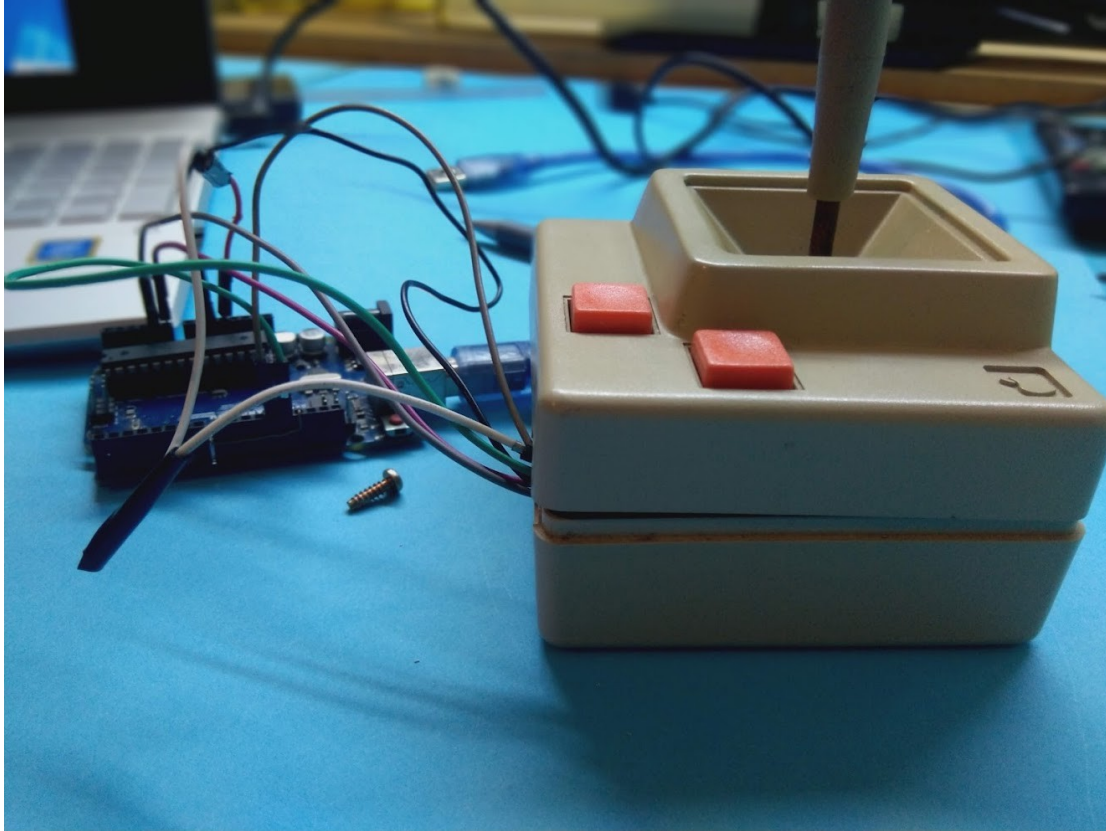

Solder like a Chimpanzee

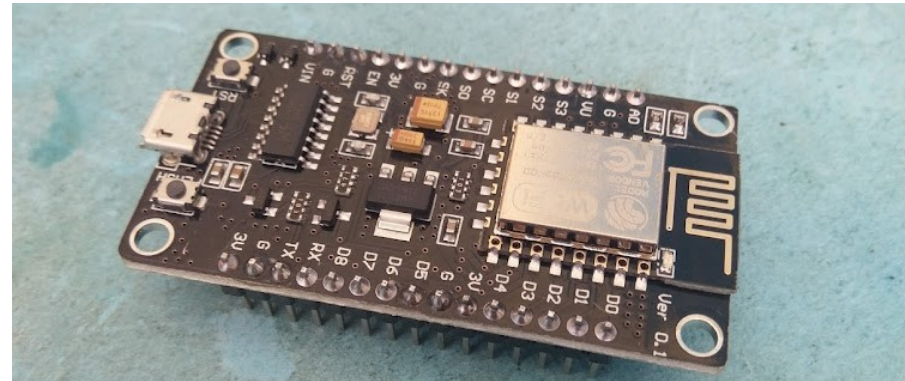

- Try not to inhale solder smoke :)

Learn to Comb Spaghetti

- Connect the wires to the Arduino
- Connect the Arduino to the PC

Laptop

Application

Simulated Keypresses

Python Program

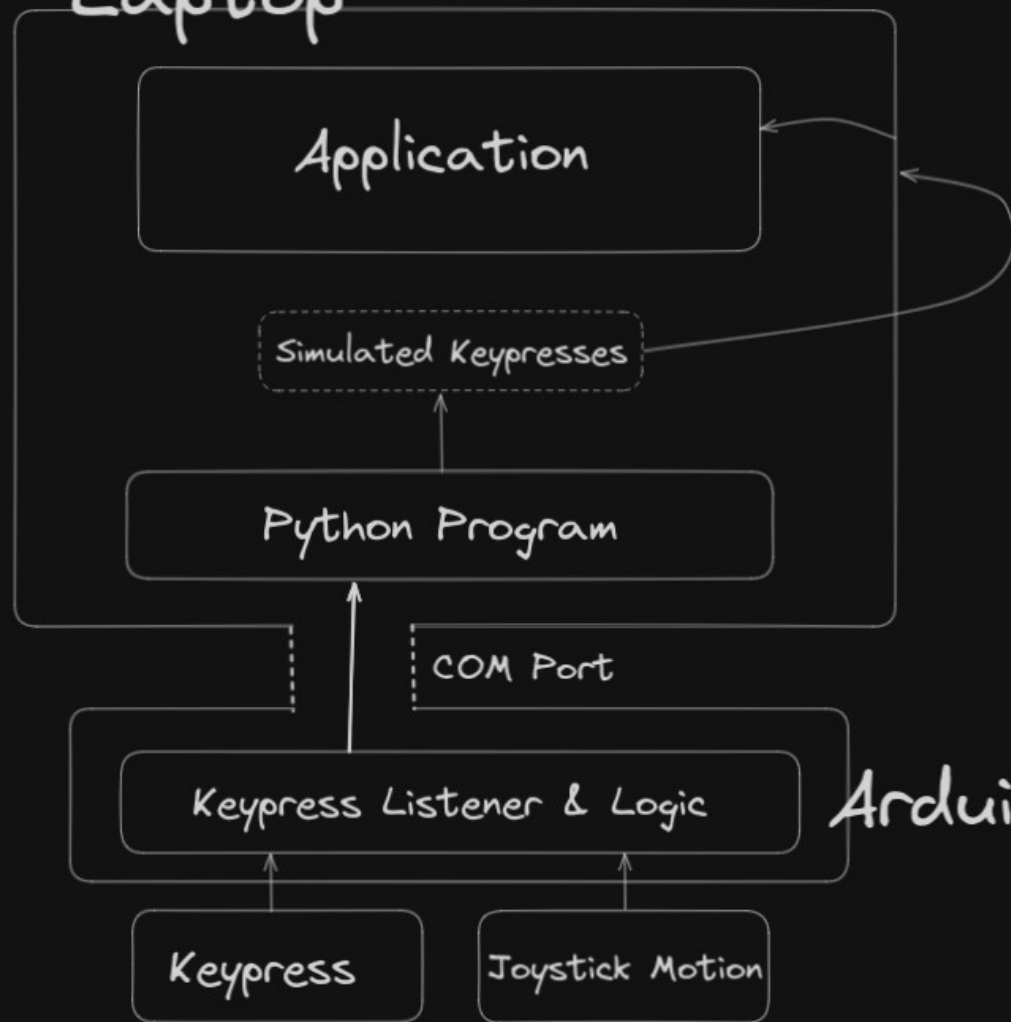

COM Port

Keypress Listener & Logic

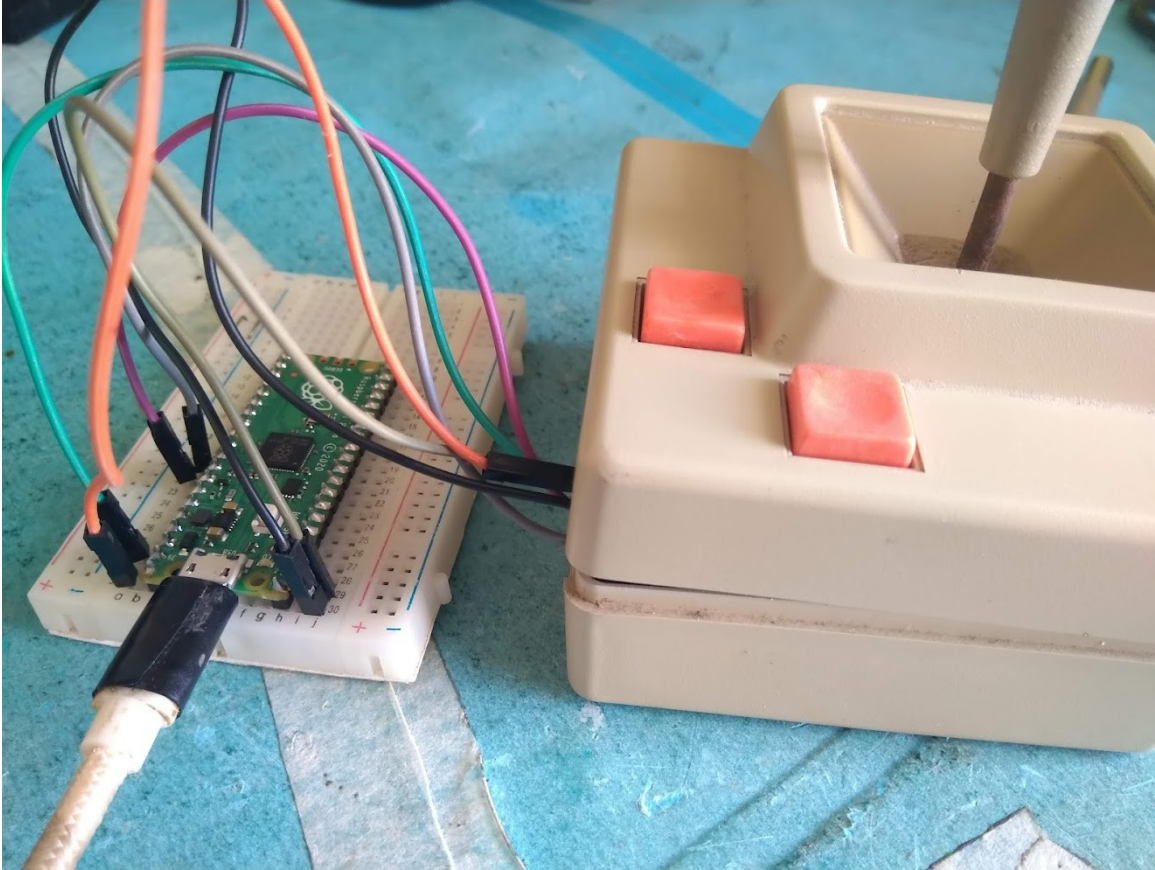

Arduino

Keypress

Joystick Motion

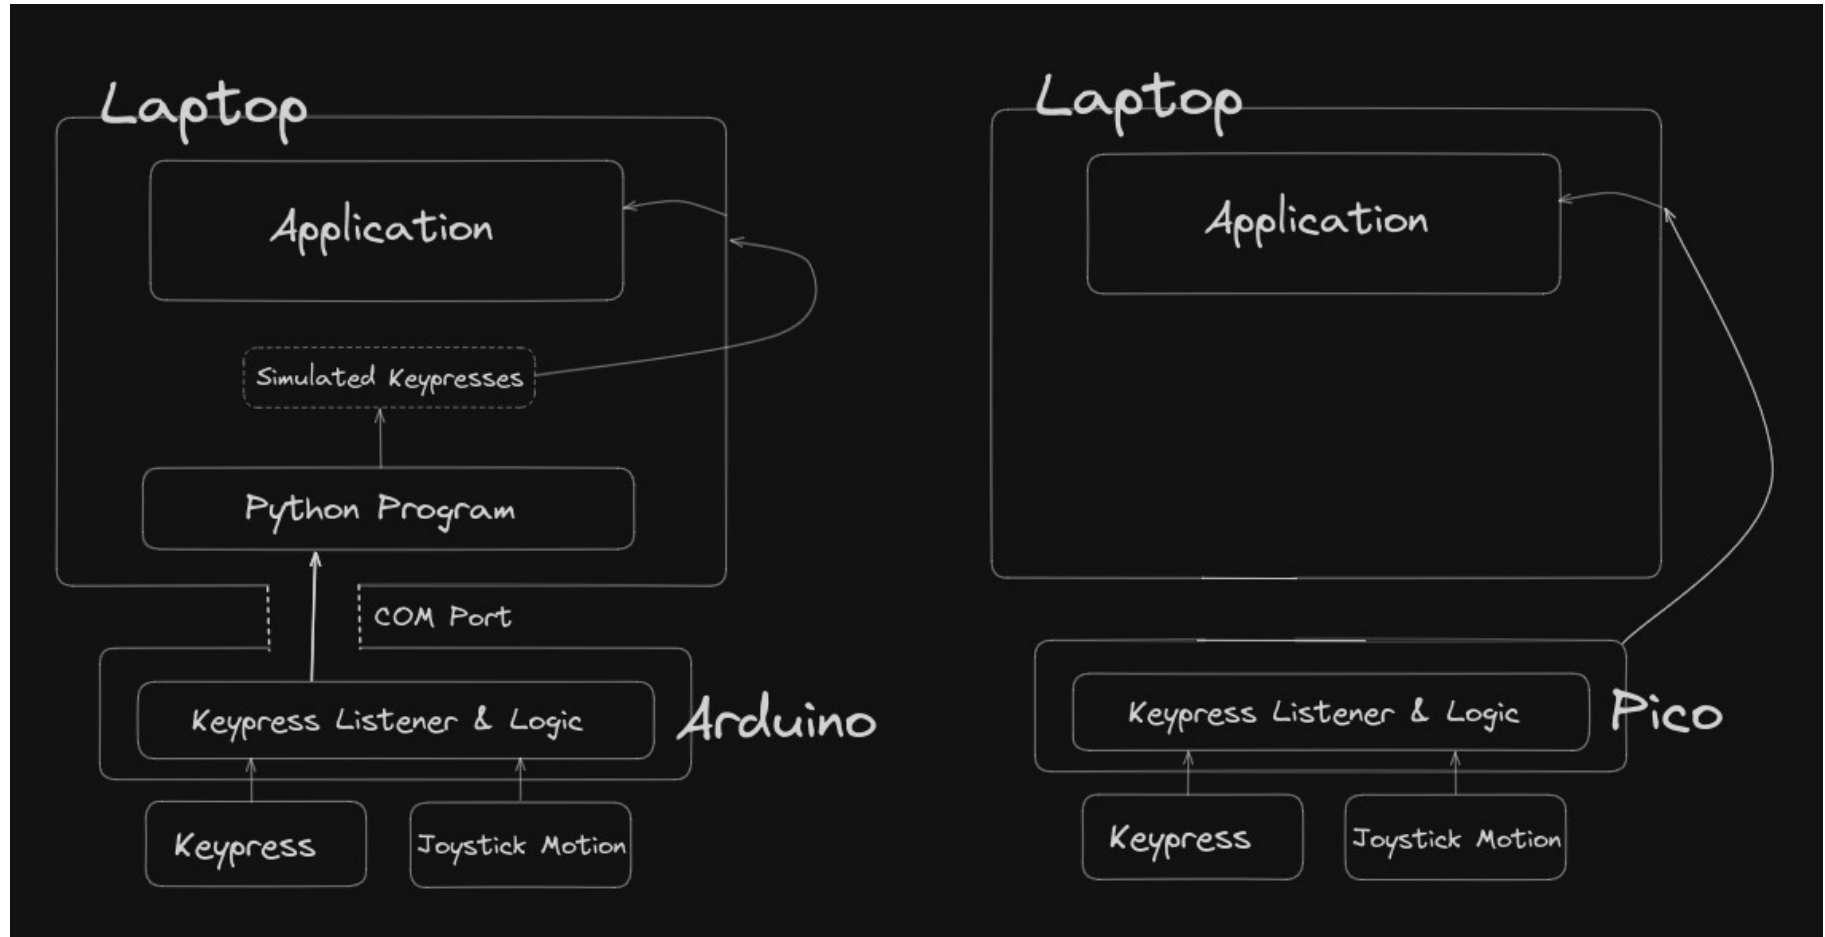

Introducing the Pico

- \$6
- Python
- Can emulate a keyboard

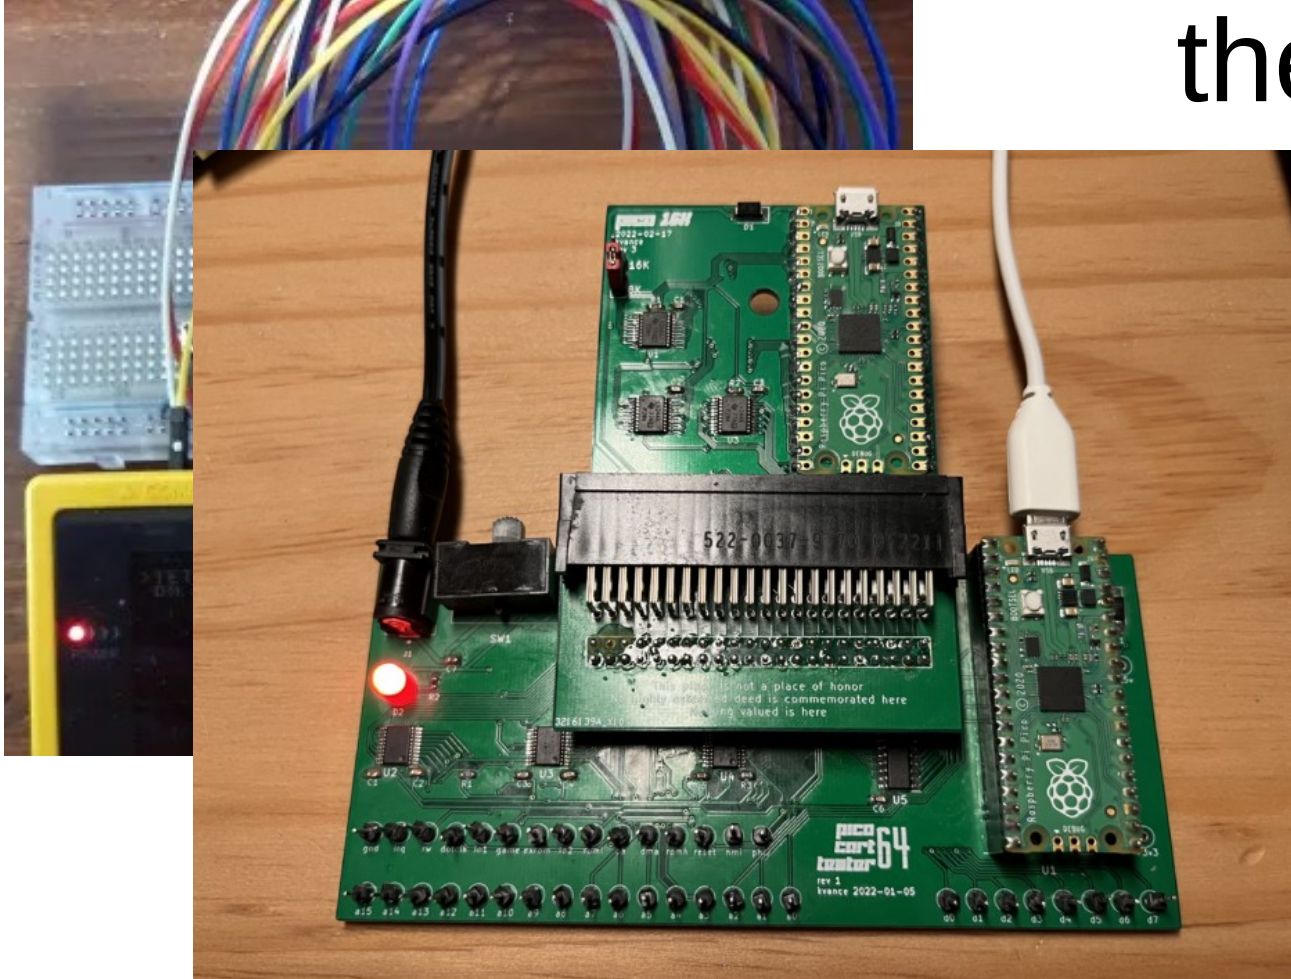

Cleaning Up My Mess

Power Anything with the Pico

Power Anything with the Pico

Power Anything with the Pico
